# PQFT Banca Performance Report

May'21

## Economic Review

Central Bank continued to keep a growth favoured stance by keeping an accommodative monetary stance albeit some inflationary pressures reflecting in Consumer Price Index (CPI). YoY CPI for May'21 stood at 10.9% compared to 8.2% last year. The spike was witnessed especially in the food group which was visible during the festive month of Ramadan although a partial lockdown was enforced. Overall national average CPI for 11MFY21 stood at around 8.83%. The country still faces a Balance of Trade crisis with remittances shoring up a major chunk of Current Account. This has been the case with 11MFY21 Current Account figures turning positive to the tune of USD 773 million compared to a deficit of USD 4,658 million SPLFY. The country also managed to shore up its Foreign Exchange Reserves to around USD 23 billion near month end, an import cover of above 4 months, compared to around USD 22 billion in Apr'21. Although the country has projected a healthy GDP growth figure of 3.94% compared to a negative growth of 0.94% last fiscal year any sharp spike in global fuel and commodity prices can trigger warnings for economic managers.

On the monetary front, central bank conducted two T-bill auctions mopping up total of PKR 1,157 billion with weighted average cut offs for 3 month, 6 months and 12 months at 7.342%, 7.5686% and 7.6629% respectively. Central Bank also conducted a PIB auction realizing ~PKR176 billion in total with a breakup of PKR72 billion, PKR65billion, PKR 13billion, PKR 15 billion and PKR 10 billion for 3 years, 5 years, 10 years, 15 years and 20 years respectively.

## Equity Market Review

KSE100 benchmark index turned positive to the tune of 8.21% while KMI30 index generated a positive return of 10.17% for the month. During the month Commercial Banks, Cements Oil Exploration sectors remained in the lime light with investors focusing aggressively on valuations followed by increase in international crude oil prices. Foreign investors remained on the selling side with a net sell of around USD43 million with the reshuffling of scrips in MSCI which failed to hinder investors' confidence in the market. Investors rejoiced GDP growth figure and market reacted strongly with the expectation of higher growth target. Market volumes indicated heavy secondary board participation while quality investors focused on main board where valuation looked attractive.

Main board items of the index are still at attractive levels despite a sharp hike in the recent month. We foresee that our Aggressive fund will not take any significant hit as our focus is mainly on main board items. But in our view, side board items have become over valued and may take a major correction in upcoming months; which could become a cause of some pressure on main board also. Participants, who cannot afford to take near term volatility risk, should focus on our Conservative Fund.

Country	Index	May-21	Apr-21
UK	FTSE-100	0.76%	3.82%
USA	Nasdaq	-1.53%	5.40%
USA	Dow 30	1.93%	2.71%
