Performance of Pak-Qatar Unit Funds

Dec'2021

Economic Review

The economic recovery remained underway during the entire year of 2021 as reflected in high-frequency indicators of domestic demand such as automobile sales, POL (Petroleum, Oil and Lubricants) sales and electricity generation. However, due to new taxes and ending of subsidies in mini budget, inflation numbers will probably keep disturbing economy and keep SBP on toes. CPI stood at 12.28% for the month of Dec-2021. On MoM basis, CPI saw a minor decline of 0.02%, mainly driven by food prices, which declined by -1.23% on MoM basis. During CY22, inflation is expected to remain on higher levels during the first half, mainly due to removal of subsidies in budgets, rising utility prices and strong march of commodity prices in international market. However, inflation outlook for 2H FY22 is expected to squeeze as economic impact of monetary tools implemented by central bank and taxes curtail local demand.

Rapid surge in demand during the year 2021, hefty increase in commodity prices (especially oil) & weakening of PKR led to ever concerning high import bills. Current Account Deficit (CAD) touched USD 1.92Bn in the month of November-2021, taking 5MFY22 to USD 7.1Bn, compared with current account surplus of USD 1.9Bn during the SPLY. Recently taken actions of currency devaluation, temporary banning/levying of regulatory duties on non-essential items etc are expected to contain balance of payment woes in 2022.

SBP Foreign reserves stood around USD 17.9bn at 2021 end on the back of Saudi deposit, Euro dollar proceeds etc. We expect foreign reserves to remain stable on back of expected resumption of IMF program, surging remittances, and planned issuance of international bond in 2022. CAD pressure can also result in PKR:USD parity touching new heights during the fiscal year.

The gov. target GDP growth of 4.8% for FY22 hinges on smooth supply chain, normalization of commodity prices along with local political scenarios. SBP raised interest rates by 100bps to 9.75 owing to rising inflation pressures dwindling PKR:USD parity. SBP carried out three T-Bills auction with target of PKR 3,350 billion. Total amount accepted was PKR 1,887 billion against maturity of PKR 3,292 billion. Central Bank gave indication of stability of short term interest rates, the 3M cut off yield dropped significantly from 10.7801% to 10.5902%. In the last auction, bids were accepted at a cut off yield of 10.59%, 11.45% and 11.51% for 3M, 6M and 12M respectively.

GOP Ijarah Sukuk auction was held on 9-Dec-21 with a target of Rs. 100bn for a period of 5 years. Bids worth Rs. 68 billion accepted in FRR Sukuk (11.40%) and Rs. 5 billion in VRR Sukuk. PIB's auction was held on 22-Dec-21. Bids worth PKR39 billion accepted in 3 Year PIB against cut off yield of 11.50%, PKR 109bn accepted in 5 Year PIB against cut off yield of 11.57% and PKR 20 billion accepted in 10 Year PIB against cut off yield of 11.76%. No bids were received for 15-years and 30-years tenures while bids for 20-year were rejected.

Equity Market Review

On M/M Basis, KSE-100 Index declined by around 1.06% while KMI All declined by 0.19%. Investors' remained reserved concerned with higher inflation figures, ballooning trade deficit which surpassed USD 5 billion. Also, spike in short-term govt. yields together with expectations of mini budget also created confusion, resulting in lower trade volumes, weaving bearish sentiments.

During the month sectors that contributed negatively to index included Commercial Banks, Cements Oil Marketing companies. While Auto Assemblers, Fertilizers, Food & Personal cares contributed positively with Mutual funds remained net sellers while Individuals and Companies along with Foreigners remained net buyers during the month.

The bourse is trading at a multi year low PE ~6 and offers heavy dividend yield in the blue chips. Market sentiments remained muted due to some pending clarity regarding gov. agreement with IMF. Investors' confidence can return to skim the market with clearance on IMF demands and improvement in Current Account Deficit (CAD) figures. We advise our long-term investors to stay in Aggressive strategy.
